

FEE SCHEDULE

Infertility Evaluation and Treatment Programme

Initial Medical Consultation:

Duration - approx 1.5hrs

Cost - £95

- Overview and explanation of the Naprotechnology (Natural Procreative Technology) approach
- Review of previous fertility investigations and treatments where appropriate
- General history taking and recording
- Explanation and proposal/arrangement of initial investigations
- Explanation of the role of Fertility Care Practitioner in the evaluation and management process; information on registering with a Fertility Care Practitioner (if not already a client of a Fertility Care Practitioner)

2nd Consultation:

Duration - approx 1.5hrs

Cost - £95

- Review of results of investigations requested at initial consultation
- Assessment of the Couple's Fertility Care Chart in relation to diagnosis and treatment
- Proposal/arrangement of further evaluation (including any necessary referral) based on the initial investigation/ evaluation outcome
- Treatment proposal and explanation
- Issuing of prescriptions if required

Follow-up Consultations:

Duration - approx 1hr (usually at 3-4 month intervals)

- Including review of ongoing fertility charting and results of further investigations
- Treatment/management review
- Issuing of prescriptions

Between medical follow-up consultations:

- Telephone or e-mail review of hormone blood tests in every cycle of treatment and prescription of treatment for the following cycle

Referral for Ultrasound Follicle Tracking

(including as many scans as required - usually 2 or 3)

This can be arranged privately by the couple themselves elsewhere - in some cases a referral from the London Centre for Naprotechnology may be required)

Miscarriage Prevention Programme
